Please provide a brief summary answering the following questions:

1. Describe the modifications you propose to make to the IRB approved research proposal, and explain the rationale for each modification.
2. Will these modifications alter the experience of the subjects enrolled in your study? Will the modifications specifically impact the risks or benefits associated with taking part in the study?
3. Attach all previously approved proposal documents (e.g. proposal form, informed consent form, instruments, letter of approval from participating agencies) and indicate any changes you have made to these documents by highlighting them in yellow.
